

Appendix D: Accounts Funding Washington State Criminal Justice Activities

Financial

Notes:

Data in this table comes from the Agency Activity Inventory, which Washington's Office of Financial Management describes as summarizing "the major activities of each budgeted agency within Washington state government. Individual [program] descriptions address the nature of the service, what clients are involved, and how much the activity costs under the current 2001-03 budget. Cost information is provided by state agencies, based on their accounting records" (Washington State Office of Financial Management, n.d.b.).

Inclusion of specific activities and functions on this list was often a judgment call about the proper scope of the term "criminal justice." While we have made efforts to be inclusive, some relevant programs may have been unintentionally omitted. Many of the activities and functions here are categorized in the source document under "Public Safety and Criminal Justice" but not all programs in that category (which includes civil justice) are listed.
